Contents

No. 1 (February 1987)

PAGE

Phage typing of *Staphylococcus aureus* associated with subclinical bovine mastitis. D. P. MACKIE, D. A. POLLOCK, S. P. RODGERS and E. F. LOGAN 1

Effect of breed of cow (Friesian and Montbéliarde) on spontaneous and induced lipolysis in milk. M.-P. CHAZAL and Y. CHILLIARD . . . 7

Effect of nature of forage on spontaneous lipolysis in milk from cows in late lactation. M.-P. CHAZAL, Y. CHILLIARD and J.-B. COULON . . . 13

Optimization of porous glass chromatography for size-fractionation of bovine casein micelles. G. P. MCNEILL and W. J. DONNELLY 19

Studies on the heat stability of milk I. Behaviour of divalent cations and phosphate in milks heated in a stainless steel system. D. G. DALGLEISH, Y. POULIOT and P. PAQUIN 29

Studies on the heat stability of milk II. Association and dissociation of particles and the effect of added urea. D. G. DALGLEISH, Y. POULIOT and P. PAQUIN 39

Mechanisms of heat inactivation of a proteinase from *Pseudomonas fluorescens* biotype I. P. DIERMAYR, S. KROLL and H. KLOSTERMEYER . . . 51

Effect of combined ultrasonic and heat treatment (thermoultrasonication) on the survival of a strain of *Staphylococcus aureus*. J. A. ORDOÑEZ, M. A. AGUILERA, M. L. GARCIA and B. SANZ 61

Effect of elevated ripening temperatures on the microflora of Cheddar cheese. S. J. CROMIE, J. E. GILES and J. R. DULLEY 69

Metabolism of the lactating cow I. Animal elements of a mechanistic model. R. L. BALDWIN, J. FRANCE and M. GILL. 77

Metabolism of the lactating cow II. Digestive elements of a mechanistic model. R. L. BALDWIN, J. H. M. THORNLEY and D. E. BEEVER . . 107

Metabolism of the lactating cow III. Properties of mechanistic models suitable for evaluation of energetic relationships and factors involved in the partition of nutrients. R. L. BALDWIN, J. FRANCE, D. E. BEEVER, M. GILL and J. H. M. THORNLEY 133

Determination of furosine in heated milk as a measure of heat intensity during processing. H. F. ERBERSDOBLER, B. DEHN, A. NANGPAL and H. REUTER 147

Contents

No. 2 (May 1987)

Effect of temporary food or water deprivation on milk secretion and milk composition in the goat. K. DAHLBORN 153

Effect on milk production of controlling muscid flies, and reducing fly-avoidance behaviour, by the use of Fenvalerate ear tags during the dry period. J. A. HARRIS, J. E. HILLERTON and S. V. MORANT 165

Failure of cortisol injected prior to milking to inhibit milk ejection in dairy cattle. H. K. MAYER and A. M. LEFCOURT 173

ACTH initiation of mammary secretion in pregnant goats is influenced by the stage of gestation and pre partum milking. H. J. STEWART and F. M. MAULE WALKER 179

Pre partum milk fat secretion and concentrations of progestins, prostaglandin $F_{2\alpha}$ and oestrone sulphate in mammary fluid of the goat. G. E. THOMPSON and J. A. GOOD 193

A glyco-phosphoprotein in human milk. N. AZUMA and K. YAMAUCHI . . 199

Effect of the protein, citrate and phosphate content of milk on formation of lactulose during heat treatment. G. R. ANDREWS and S. K. PRASAD . 207

Effects of milk protein genetic variants and composition on heat stability of milk. D. M. MCLEAN, E. R. B. GRAHAM, R. W. PONZONI and H. A. MCKENZIE 219

A study of the heat stabilities of a number of indigenous milk enzymes. A. T. ANDREWS, M. ANDERSON and P. W. GOODENOUGH 237

Purification and characterization of a cell wall proteinase from *Streptococcus lactis* NCDO 763. V. MONNET, D. LE BARS and J.-C. GRIPON . . . 247

Formation of volatile aroma compounds and carbon dioxide in yogurt starter grown in cows' and goats' milk. G. RYSSTAD and R. K. ABRAHAMSEN . 257

Comparison of a gelation and a chromogenic *Limulus* (LAL) assay for the detection of Gram-negative bacteria, and the application of the latter assay to milk. A. SVENSSON and B. HAHN-HÄGERDAL 267

A modified ultra high temperature treatment for reducing microbial lipolysis in stored milk. A. R. BUCKY, P. R. HAYES and D. S. ROBINSON . . 275

Peptidases from two strains of *Pseudomonas fluorescens*: partial purification, properties and action on milk. K. SHAMSUZZAMAN and R. C. MCKELLAR 283

Assay of proteinases of psychrotrophic bacteria in milk using Hide Powder Azure and a simple procedure for clarification of milk. D. STEAD . . 295

Effect of manipulation of milk composition and curd-forming conditions on the formation, structure and properties of milk curd. M. L. GREEN . 303

Influence of pH, type of enzyme and ultrafiltration on the retention of milk clotting enzymes in Camembert cheese. P. GARNOT, D. MOLLE and M. PIOT 315

No. 3 (August 1987)

Closing forces of the bovine teat canal. D. M. Williams and G. A. Mein . 321

Compressive load applied by the teatcup liner to the bovine teat. G. A. Mein, D. M. Williams and C. C. Thiel 327

Dissemination of staphylococci in mice with experimental mastitis. J. C. Anderson 339

Heat stability of milk: influence of modifying sulphydryl-disulphide interactions on the heat coagulation time – pH profile. H. Singh and P. F. Fox 347

Purification of goats' milk casein by reversed-phase high-performance liquid chromatography and identification of α_{s1}-casein. J. Mikkelsen, P. Højrup and J. Knudsen 361

Quantitative fractionation of casein mixtures by fast protein liquid chromatography. D. T. Davies and A. J. R. Law 369

Heat-induced association-dissociation of casein micelles preceding coagulation. K. S. Mohammad and P. F. Fox 377

Ethanol stability of casein micelles – a hypothesis concerning the role of calcium phosphate. D. S. Horne 389

Evidence for temperate bacteriophages in two strains of *Lactobacillus bulgaricus*. P.-J. Cluzel, M. Veaux, M. Rousseau and J.-P. Accolas . 397

Indirect assay of milk clotting activity of *Mucor miehei* proteinase (Fromase) in combined rennets. E. Beránková, P. Rauch, J. Káš, V. Hušek and E. Paluska 407

Comparison of a simple butterfat agar medium with other media used for isolation and enumeration of lipolytic bacteria from dairy products. A. W. Shelley, H. C. Deeth and I. C. Macrae 413

Whipping of creams from ultrafiltered milk. P. G. Scurlock 421

Improvement in the quality of the dried fermented milk product, oggtt. I. M. Al-Ruqaie, H. M. El-Nakhal and A. N. Wahdan 429

Effect of ultrafiltered milk and use of different starters on the manufacture, fermentation and ripening of Havarti cheese. K. B. Qvist, D. Thomsen and E. Høier 437

Review article. Recent studies on nucleotide sequences encoding the caseins. J. Bonsing and A. G. MacKinlay 447

No. 4 (November 1987)

Microbiological assay of blood serum for the vitamin B_{12} status of dairy cows. G. M. Carlos, S. B. Telfer, C. L. Johnson, D. I. Givens, R. J. Wilkins and R. D. Newberry 463

Use of monoclonal antibodies for radioimmunoassay of water buffalo milk progesterone. R. Capparelli, D. Iannelli and A. Bordi . . . 471

Effect of casein and β-lactoglobulin genotypes on renneting properties of milks. G. Pagnacco and A. Caroli 479

An automated enzymic micromethod for the measurement of fat in human milk. A. Lucas, G. J. Hudson, P. Simpson, T. J. Cole and B. A. Baker 487

Lactulose content, colour and the organoleptic assessment of ultra heat treated and sterilized milks. G. R. Andrews and S. V. Morant . . 493

Heat stability of milk: role of β-lactoglobulin in the pH-dependent dissociation of micellar κ-casein. H. Singh and P. F. Fox 509

Heat stability of milk: influence of colloidal and soluble salts and protein modification on the pH-dependent dissociation of micellar κ-casein. H. Singh and P. F. Fox 523

Production of extracellular lipases and proteinases during prolonged growth of strains of psychrotrophic bacteria in whole milk. D. Stead . . . 535

Kareish cheese prepared from ultrafiltered milk. A. I. El-Zayat and M. M. Omar 545

Microbiological quality and composition of two types of Spanish sheep's milk cheeses (Manchego and Burgos varieties). M. C. García, A. Otero, M. L. García and B. Moreno 551

Review article. Fermented milks and their trends. I. Microbiological aspects. V. M. Marshall 559
